John W. Sands
Member of Development and Research Division
THE INTERNATIONAL NICKEL COMPANY, Inc.
New York

will speak on

“EFFECT OF STRUCTURE ON MACHINING STEELS”

THURSDAY, FEBRUARY 13, 1947, 6:30 P.M.
SUN ROOM, CURTIS HOTEL

Graduating from the Massachusetts Institute of Technology, Mr. Sands joined the International Nickel Company Development and Research Division in 1923, and has served ever since in various capacities connected with the development of alloy steels and high iron-nickel alloys, eight of these years having been spent in the Research Laboratories.

He was manager of the Central Atlantic Coast Technical Section of the Development and Research Division from 1938 until 1942, when he went to Washington on the dollar a year basis as a member of the Appeals Board of the War Production Board.

Mr. Sands has been a member of ASM for about 20 years, serving as chairman of the New York Chapter in 1939-1940; he is also a member of the AIME and the SAE. He is the co-author with H. J. French of the book “Nickel Alloy Steels,” which is considered as an authority on the subject.

As Mr. Sands is one of the foremost men in his field, members should make a special effort to attend this meeting.

DINNER $1.75. PLEASE RETURN YOUR RESERVATION CARD PROMPTLY
