E. Von Hambach
Research and Development Engineer
CARPENTER STEEL COMPANY
Detroit, Michigan

WILL SPEAK ON

"STAINLESS STEELS AS APPLIED TO AIRCRAFT"

WEDNESDAY, OCTOBER 6, 1943, 8:00 P.M.
Men's Lounge, Coffman Memorial Union
University of Minnesota

Mr. Von Hambach is one of the “tops” in the field of stainless steels for aircraft, and his discussion of the subject will be of unusual interest.

We are fortunate in prevailing upon him to be our guest on this occasion, for he is constantly traveling between the east and west coasts, wherever airplanes are built. This should be a “must” meeting.

During the season we shall have a number of top-notch speakers, for the Program Committee has arranged one of the best programs the Chapter has had for some time.

There will be no dinner because the armed forces have taken over the food service at the Coffman Memorial Union. The cafeteria in the basement will be open, where light meals may be obtained at a reasonable price.
