Mr. Schlegel will cover briefly the history of the manufacture of tool steels, the method of inspecting their quality, their heat treatment, and a general discussion regarding their application. He undoubtedly will stress water hardening and oil hardening of tool steels, which are so commonly used in this area.

After the technical talk, he will be glad to answer any questions which may arise regarding high speed or other tool steels.

Guests are welcome. Steak dinner $1.75. Reservations are necessary, so please mail your card promptly.
